

## SW-IR102 Data-sheet

### Smart IR home controller

#### Description

A smart control controller for controlling all household electrical appliances with an infrared (IR) function, including climates, televisions, audio systems, lighting, ceiling fans or any device with a remote controlled by infrared (IR) technology. The controller has the remote's self-learning capability and the ability to download built-in code from the cloud. The controller has a 360-degree transmission capability in its environment and can be located within a radius of about 8 meters from the devices it controls.

#### Features

- Supports 2.4GHz Wi-Fi frequency (does not support 5GHz frequency).
- Dimensions about 26x78x78 mm
- Weight about 77 grams.
- The controller is powered by a 5V 1A USB charger (not included in the package)
- Option to create unlimited schedules.
- Powered by Tuya Smart Application.

#### Tuya Smart Application

- Free Application.
- Easy connect to devices with Smart control features.
- Add and control multiple devices at once with one App.
- Voice control via Amazon Echo and Google Home.
- Easily share devices among family members.
- Receive real-time alerts to ensure safety.
