ST-710NR-AC**

Wireless GAS Detector

Product Overview:

The gas detector with a detection range of 0~100%LEL is developed by using advanced micro processing technology combined with excellent quality and long-life gas sensor.

It is used for detecting combustible gas, and can carry out safety detection and early alarm for fire, explosion and poisoning accidents caused by the diffusion of combustible gas. The detector has high sensitivity, good reliability, anti-smoke and anti-alcohol interference.

Features:

- Gas sensor, linear good, high stability, long life.
- Simple installation, easy to use.
- Built-in buzzer, alarm sound function.
- LED status indicators, intuitive status of normal operation of the alarm, the failure.
- Intuitive easily operation buttons, with self-test functions.

Technical Parameters

Working voltage	AC220V ± 15% / 50Hz
Sensor Life	6 years
Power consumption	≤ 3W
Alarm state	≤ 4W
Detection gas	methane
Operating temperature	-10°C ~ +55°C
Humidity	≤ 95%
Product size	105mm X 105mm X 34.5mm
Shell material	Flame retardant ABS
