

**Model No.  
ST-6121**

## Stark RFID Tag, Arm/Disarm.

### Product Overview:

ST-6121 RFID tag utilizes an induced antenna with coil voltage for operation. The memory chip on the tag contains a unique identification code, which can be sent securely when placed in close proximity of the RFID reader of control panel. The ST-6121 RFID enables users to arm and disarm the alarm system.

### Features:

- Arm/ Disarm alarm system
- Name every RFID tag for different users.
- Convenient to carry and use
