Stark Wireless Indoor Siren (with repeater)

Product Overview:

The indoor wireless acousto-optic siren adopts 8 bits MCU technology, built-in 16 two-color LED lights and 1 high-decibel buzzers. The indoor wireless acousto-optic siren not only can connect with the alarm host via wireless transmission, but also can be used as an alarm host and a repeater. It is widely used in banks, shops and villas etc. There are a high-decibel sound output and highlight flashes when a signal is triggered, causing the intruder to flee the scene in a panic, strengthening alarm deterrence and improving the safety of the protection environment.

Features:

- Used as a repeater, it can transmit 32 wireless accessories.
- 3 colors of indicator lights flashing modes.
- Acousto-optic notice when operating arm/disarm.
- Support 8 remote controls, 32 detectors.
- Adjustable light brightness on standby status.
- A strong deterrence with loudness alarm sound and dazzling warning lights.

Technical Parameters

| | |
|--------------------------------|--------------------|
| Power | 100-240VAC |
| Standby Current | <100mA |
| Alarm Current | <150mA |
| Operating temperature | -20°C ~ +55°C |
| dimension (L*W*H) | 73×73×90mm (L×W×H) |
| Humidity | 40-80% |
| Wireless Receiving distance | ≥70M (Open Area) |
| Wireless Transmitting Distance | ≥90M (Open Area) |
| Alarm Sound | 100dB |
| Emission Frequency | 433.92 MHz |
