Hybrid (Wired & Wireless) Engineering Alarm KIT

Product overview

This gsm intruder alarm system adopts the latest digital sensor and transmission technology, has the function of theft prevention, fire prevention and leakage prevention. This device supports dot matrix LCD display, English text and text display, optional with double network (PSTN wired network and GSM wireless network). You can also remotely control and program the panel with IOS or Android apps that support multiple languages. This system adopts high performance and low power consumption microprocessor, has many functions, stable module design and other characteristics, widely used in residential, shopping mall, financial system, enterprise and other fields.

Product Features:

- 8 wired zones (expandable) + 32 wireless zones
- GSM+LAN+PSTN networks built-in modules
- Built-in 4*4 keypad and dot matrix LCD display
- Built-in Voice dialer, Built-in siren, Built-in receiver
- Support 4 wired keyboard
- Support all the wireless accessories of Stark System
- Android and iOS FREE smart APP
- 2 Key fobs, Network Cable, PSTN Cable & Power Cable included in the KIT

Technical Parameters:

- Power AC power 220V±15%
- Working Environment -10°C~ +50°C
- Frequency 433.92Mhz
- Size 264x260x78 mm (L * W * T)
- Humidity 40 ~ 70%
- Battery 12V/7Ah
- 90dB Siren Output
- Distance between door magnet and alarm panel ≥ 200m (in the open area)
