

**Model No.
ST-301A**

Wired Octuple Relay Module

Product overview

ST-301A provides octuple relay output interface, it is suitable for controlling the electrical equipment. ST-2908L can be connect with 2 pieces of relay modules, namely has 16 relay output interfaces, each relay interface can be set to follow events output, following zone output.

Technical Parameters

Power	DC 10.5 V ~ 15 V
Standby current	≤ 30mA
Operating temperature	-10°C~+50°C
Dimensions	98×81×26mm
Number of relays	16
Alarm output	Relay output (normally closed/open optional)
